EXPERIENCE

Senior Quantitative Consultant, JANA Investment Advisors

Sep 2023 – Present

Led the design, development, and operation of financial models advising on \$1T+ in client assets. Advanced from Quantitative Consultant within the first year.

- Conducted quantitative research into key portfolio construction questions, bringing a risk-based lens to SAA decisions for currency exposure, regional allocation, and portfolio design
- Designed and implemented stress testing and liquidity models for diversified portfolios
- Collaborated on capital market assumption methodology; responsible for model implementation
- Designed retirement and lifecycle investment products for superannuation clients
- Drove operational efficiency across the modelling platform through automation and streamlined workflows
- Managed two direct reports and mentored junior staff

Senior Consultant, Deloitte

Mar 2019 – Sep 2023

Software engineer, data scientist (computer vision), and operations consultant across client engagements including Deloitte's Digital Twin solution. Advanced from Graduate to Senior Consultant over four years.

- Managed software engineering teams delivering machine learning solutions, including a computer vision system analysing thousands of live CCTV feeds
- Led data analysis for financial and resource planning, advising on A\$100M+ in payments and A\$10M+ in resourcing on a telecommunications project

Academic Tutor, Queens College

Mar 2017 – Jun 2020

Taught undergraduate economics and econometrics students.

Intern, Viburnum Funds

Nov 2017 – Dec 2017

Viburnum Funds is an Australian private equity fund based in Perth.
